PROFILE

Computer Science and Engineering student and Java Full Stack Developer focused on building responsive, reliable and database-driven web applications using Java and modern web technologies. Builds frontend interfaces, Java backend applications, REST APIs and MySQL-based systems.

TECHNICAL SKILLS

Languages	Java, JavaScript, Python, SQL
Frontend	HTML5, CSS3, JavaScript, Responsive Web Design
Backend	Java, JDBC, REST APIs, HTTP Server, FastAPI
Database	MySQL, MySQL Workbench
Tools	VS Code, Git, GitHub, Postman, PowerShell

PROJECTS

Hospital Management System | Java, JDBC, MySQL, HTML, CSS, JavaScript, REST APIs

Role-based hospital platform for administrators, doctors and patients. Supports patient records, doctors, appointments, advanced billing and medical reports through multiple Java APIs connected to MySQL.

Insider Threat Detection System | Python, FastAPI, Machine Learning, MySQL

Security-focused application for analysing activity data and supporting the identification of potentially suspicious user behaviour through machine-learning workflows and a web interface.

Personal Portfolio | HTML, CSS, JavaScript

Responsive portfolio website presenting skills, education, projects and contact information with interactive navigation, animated terminal, downloadable resume and FAQ.

EDUCATION

B.Tech - Computer Science & Engineering

NBKR Institute of Science and Technology | 2022-2026

STRENGTHS

Problem solving • Practical application development • Database integration • Responsive interface development • Continuous learning
